Anapod CopyGear is an intuitive application whose goal is to copy music, tracks and playlists from your iPod to your computer. It is simple to use even by novices. The interface is based on a regular window divided into two panels for navigating directories and copying files. After making a file selection, you can copy them to a custom directory on the computer via the context menu. Furthermore, Anapod CopyGear provides a search function that's handy when you're dealing with large amounts of data. When it comes to backup options, you can ask the tool to automatically import output songs and playlists into the iTunes library, establish a default backup folder, as well as set file naming rules, and overwrite existing files. There are no other notable options available through this program. Anapod CopyGear is not a concern to the computer's overall performance, as it uses very low CPU and RAM. It has a good reaction speed and carries out a task rapidly and without errors. We haven't come across any issues in our tests. On the downside, Anapod CopyGear is feature-limited and it has not been updated for a long time, so it is not compatible with later operating systems.
